

# MS Curriculum Overview

<b>1. Course Title</b>	<b>6th Grade Science</b>			
<b>2. Course Overview</b>	Students investigate real-world questions about how heat moves, how weather and water cycles shape our environment, how Earth's surface changes over time and how living things heal and function. Through hands-on investigations, data analysis, modeling and evidence-based discussions, students learn to think and work like scientists.			
<b>3. Main Resource Used</b>	OpenSciEd			
<b>4. Unit Sequence &amp; Titles</b>	<b>Unit 1</b>  6.2 Thermal Energy	<b>Unit 2</b>  6.3 Weather, Climate and Water Cycling	<b>Unit 3</b>  6.4 Plate Tectonics and Rock Cycling	<b>Unit 4</b>  6.6 Cells and Systems
