

Grade 7 Digital Citizenship

1. Course Title	Grade 7 Digital Citizenship		
2. Course Overview	<p><i>In 7th grade digital citizenship the curriculum addresses topic areas that are based on academic research and concerns from children, educators, and parents. The lessons are intentionally designed to cultivate both skills and dispositions to help young people thrive in our interconnected world. This is all the more important because children and teens face many decisions and dilemmas as they live their lives with and through media and technology, from what they're consuming and what they're sharing, to how they're interacting and communicating with others. In full, this course prepares students to find the balance in their online presence and to become responsible digital citizens and consumers of media, instructing on the responsible use of technology to learn, create, and participate in our ever-changing online world, especially in consideration of social media.</i></p>		
3. Main Resource Used	Commonsensemedia.org , ISTE standards, AASL standards
